

It has come to my attention that the FCC is soliciting public comment regarding an NAB petition seeking limitations be placed on satellite radio providers. I am a subscriber to XM radio - and obviously benefit from the services they provide. These are services which traditional broadcast stations either provide in a less appealing format or don't provide at all.

While I can understand why the NAB might want the FCC to support its protectionist agenda, I do not believe it is in the public interest for the FCC to do so. I respectfully urge the FCC to reject the NAB's petition 04-160 and allow satellite broadcasters to continue to provide the kinds of programming which their paying customers demand and deserve.

Thank you.
